
A. Multi-seed amplification by group (SEM)
Normalized amplification $G_l(\delta)$
Block 1
Block 2
Block 3
Block 4
Logits
Layer
High sensitivity (n=50)
Median sensitivity (n=50)
Low sensitivity (n=50)
Main frequency (n=1)
B. Logits and fool ratio (r=0.960)
Mean fool ratio
$G_{\text{logits}}(\delta)$ mean
(16, 16)
Mean fool ratio
